High School*

Together, Let's Grow Deeper In Christ!

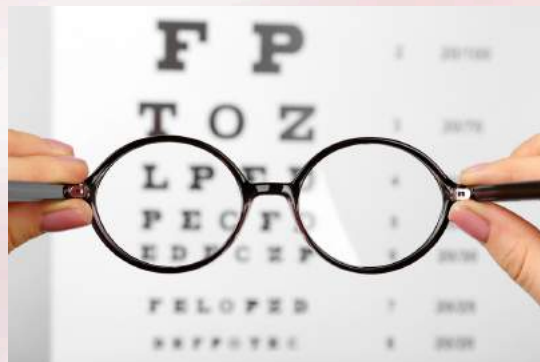

JULY IS...

Healthy Vision Month

Did you know, African Americans, Hispanics, and Native Americans have an increased risk for developing some eye diseases? Obesity, having a family history of eye disease, aging and other health conditions such as diabetes and high blood pressure can also play a role in the development of some eye diseases. Research shows protecting your overall health can go a long way toward keeping your eyes healthy! Every day, you can take simple steps to keep your eyes healthy. For example, taking breaks from prolonged computer use or wearing sunglasses to protect your eyes against the sun. Scheduling a comprehensive eye exam is the BEST way to stay on top of your eye health. In that way, eye diseases can be caught early and treated immediately! For more tips on how to protect your eyes visit:

[Learn About Eye Health | National Eye Institute \(nih.gov\)](https://www.nih.gov)
